Notes:

Databases: 1=Pervasive.SQL, 2=MS-SQL, 3=Oracle, 4=IBM DB2 (Oracle & DB2 only at the 5.1 and higher level)

TBD= To Be Determined

1. Macros are not supported in Sage Accpac version 5.2 or later versions.

2. Currently, the number changers do not support WMS, CRM, ePOS or Exchange. In order to process a Number Change on a database with ePOS activated it, you must first make sure that all ePOS Registers are closed, cashed out, and all transactions processed into ACCPAC. Any new changes will be reflected the next time a Database Update/Force New Database is performed on each register.

3. This product will not support new features (Transaction Analysis & Optional Field Creator) in Sage Accpac version 5.3 and later versions.

4. EFT Direct Payroll version 5.3 does not have consolidation (multifile) capabilities. Version 5.4 does have multifile capabilities.

5. These products are supported by the number changers but only for the "Change" capability, not the "Combine or Copy" capability.

6. Financial Link Professional does not work with Pervasive 8.7 with Sage Accpac ERP 5.4.

7. Functionality will be rolled into core module with the next release.

General Notes:

All Options Products only work with Desktop Versions of SM, not web deployed (unless otherwise indicated).

Unless otherwise indicated, Options products work with all "Editions" of Sage Accpac ERP.

Sage Accpac Options products are tested and supported on the current and one previous version of Sage Accpac.

8. Product officially discontinued.

9. KPI and Business Advisor functionality built into CFO 5.4.

10. Clients on Software Assurance for eFile 5.3/5.4 will receive the January 2008 tax update.

11. Item Number Change is not compatible with RMA.
