ACCPAC Online

Anytime, Anywhere Access

Hosting your back-office software at ACCPAC Online provides your business with convenient access to your application data anytime, anywhere. ACCPAC Online connects multiple remote locations to the same system, allowing critical information to be easily shared. For instance, your head office, warehouse, and employees can access application data simultaneously from multiple locations. This free flow of information across the enterprise enables you to make more informed decisions and reach new levels of customer profitability.

Rapidly Deployed

With ACCPAC Online, you can grow your company without growing your IT support burden. Simply add more applications as you require more functionality, and add more users without worrying about installation, configuration, and support of additional hardware and software. ACCPAC Online makes it easy for you to use powerful business management applications today, and add advanced capabilities, as you need them, tomorrow.

Affordable

With only a PC and an Internet connection, you can start using ACCPAC Online for your business management software needs and avoid most of the equipment and personnel costs that might otherwise be required. There are no servers to purchase and manage, database to administer, or nightly backups to perform. One convenient monthly payment covers infrastructure software, maintenance fees, daily backups, and software updates. Customers can immediately start realizing return on their investment.

Platform Flexibility

ACCPAC Online provides the capability to move to an on-site system if and when your business requirements change. In fact, Sage Accpac is the only business management application that offers seamless migration to an on-site system without extensive customization or high cost. This flexibility gives you data portability—you choose the deployment method that best meets your needs.

Local Training and Support

With a global network of well-trained and experienced business partners, Sage Software can provide you with on-site consulting, training, and implementation assistance to help you make the most of your hosted solutions.

Robust Security

ACCPAC Online deploys powerful security and systems management technology to provide your business with infrastructure management and systems monitoring of your business-critical applications.

Responsive Customer Service

ACCPAC Online is managed by a team of certified experts in the field of application hosting. With extensive Sage Accpac support experience, these well-trained professionals provide 24/7 customer support, regular maintenance and upgrades, and full backup and recovery capabilities—without disrupting your business.

Guaranteed Level of Performance

ACCPAC Online provides reliable network and application availability and performance. We offer you Service Level Agreements that specify the levels of performance, consistency, and availability that you can depend on.

Smart Value

By hosting your applications at ACCPAC Online, you eliminate the upfront costs associated with purchasing, installing, and configuring specialized hardware and software. You also eliminate the long-term costs associated with staffing, maintaining, and upgrading your system whenever new technology is introduced. Best of all, accessing your applications through ACCPAC Online gives your company a low-cost strategic advantage that is tough to beat, allowing you to concentrate your valuable time and dollars on your growing business.
